React Project Week Road Map

(This is not a Hard Core Road Map. Your pace and order of operation may differ from what is listed below and that is ok)

Weekend:
1) Plan application features and what that looks like codewise and visually
2) Create documentation for Wiki
3) CSS for landing page and authentication
4) Research clone and tools needed

Monday:
1) Finish planning application routes, components and approach
2) Turn in Wiki Documentation
3) Migrations for first MVP
4) All Routes for first MVP
5) Seeders for first MVP

Tuesday:
1) Work on Frontend React for first MVP
2) Refactor Backend if needed
3) CSS for first MVP

Wednesday:
1) Debug finishing touches for first MVP
2) Migrations, Routes & Seeders for second MVP
3) Begin Frontend React for second MVP

Thursday:
1) Finish Frontend React for second MVP
2) Debug app functionality
3) CSS for second MVP

Friday:
1) Work on 3rd MVP or Bonus Features
2) Fix parts of app for which you will need instructional help
3) Deploy updated app

Weekend
1) Clean up code
2) Write notes that help you remember code in application
3) Fix bugs
4) Remove console.logs
5) Practice presentation

Monday:
1) Don't add anything to the app!!!
2) Practice presentation
3) Write notes that help you remember code in application
